Scam Telephone Calls

Croydon Trading Standards have received a report of a Croydon resident receiving a scam telephone call from a company purporting to deal with internet connection and threatening to cut off the internet supply if the resident did not press certain keys on the telephone key pad.

Suspecting this was a scam, the victim ended the call so we do not know what else they wanted.

Never hand over any personal details over the phone to a suspicious caller and do not follow prompts to enter any keys to a cold caller.
